Session 6: Spring mvc + hibernate integration

controller

db

view

model
service + dao layer
throws PaneerNotFoundEx

DataAccessEx

:)

SQLEx
HibernateEx
MongoEx
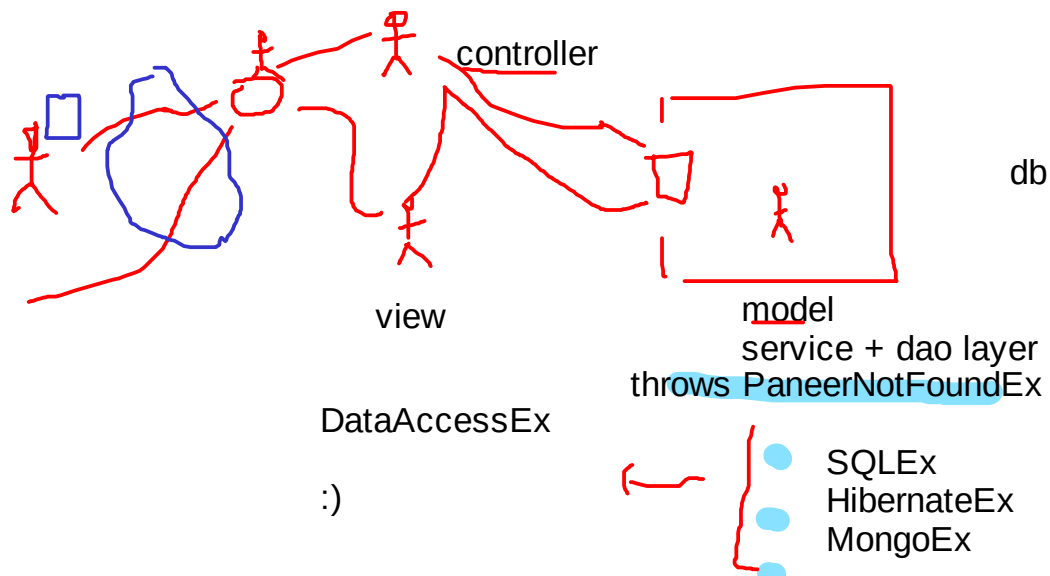

org.springframework.dao.annotation.PersistenceExceptionTranslationPostProcessor

framework vs lib

Design pattern and framework?
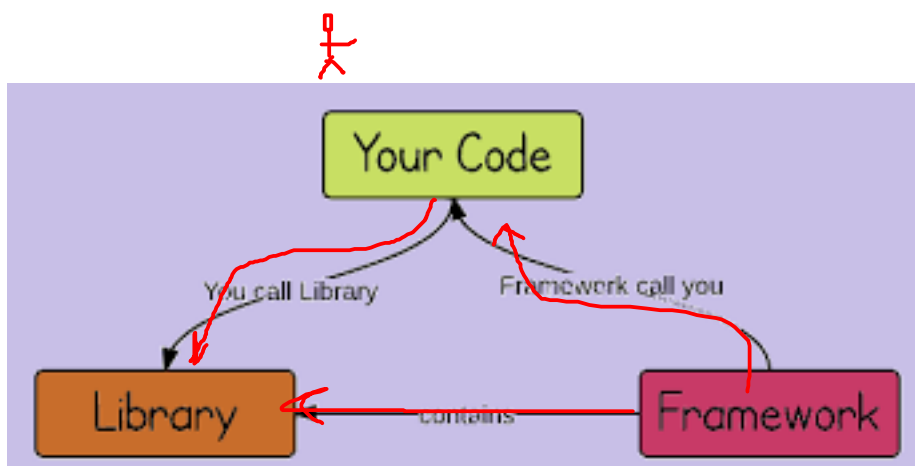

A design pattern is a concept, or a receipt for how to
get a specific problem done.

A Framework is code ready for use, usually packaged in a way
 that makes creating an application much easier

maggi

instruction

half backed food

inversion of control

Spring mvc : build on top of servlet api

What is servlet: peice of java code that run and produce
dynamic html

used to create dynmic web app

servlet vs jsp (jsp transleate to servlet)

servlet: controller
jsp: view layer (look like html)
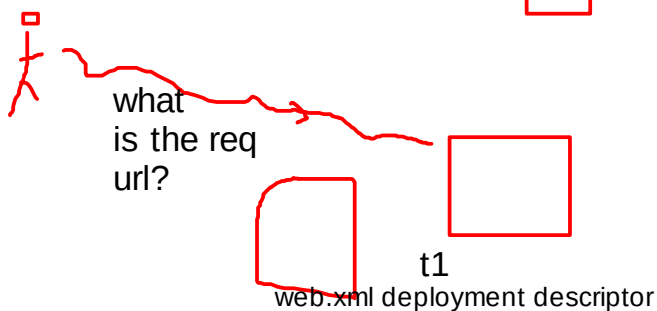

you need container : tomcat 9

Spring MVC

Servlet

container   web server

tomcat vs apache httpd server vs negix

web server

web container

Request 1

Dispatcher Servlet

Controller

ModelAndView

4
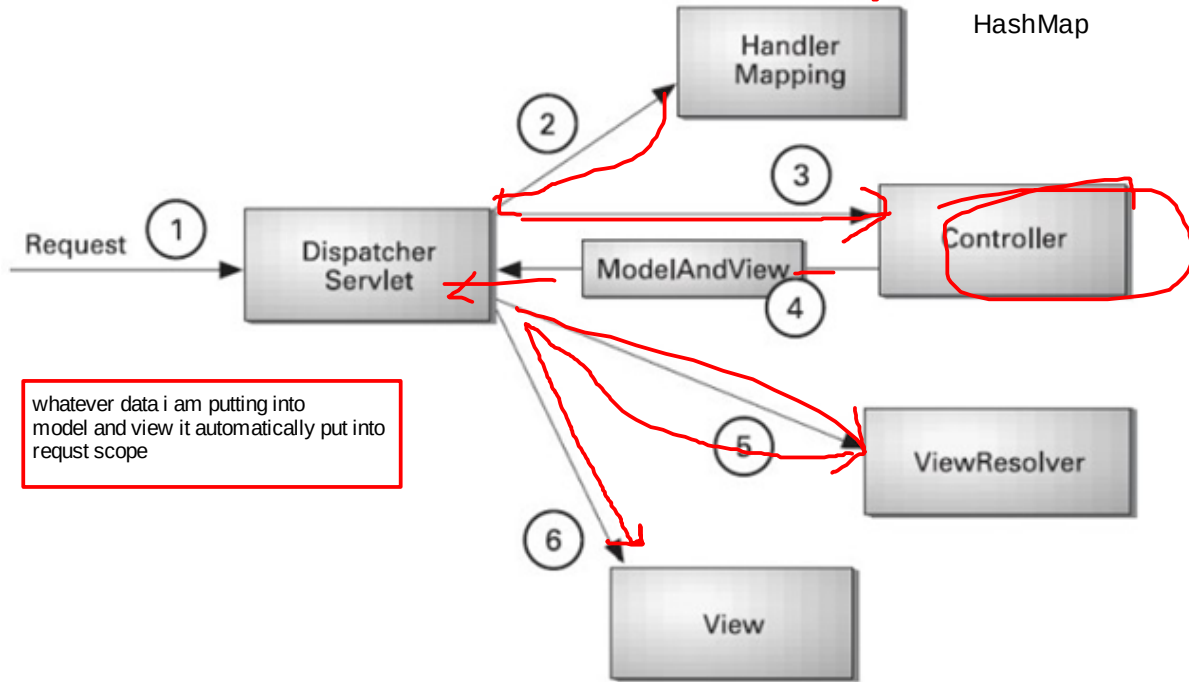

whatever data i am putting into
model and view it automatically put into
requst scope

5

ViewResolver

6

View

/WEB-INF/views/mypage.jsp

```
<bean class="org.springframework.web.servlet.view.InternalResourceViewResolver">
    <property name="prefix" value="/WEB-INF/views/"/>
    <property name="suffix" value=".jsp"/>
</bean>
```
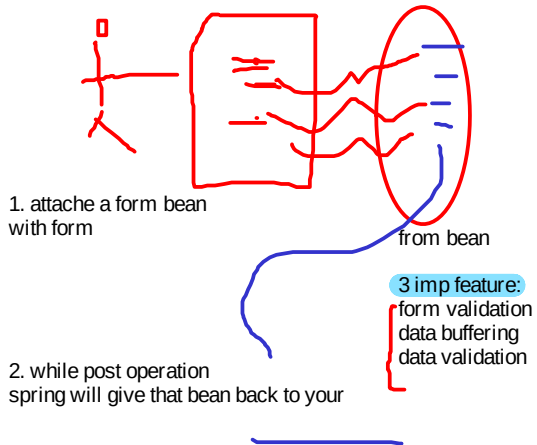

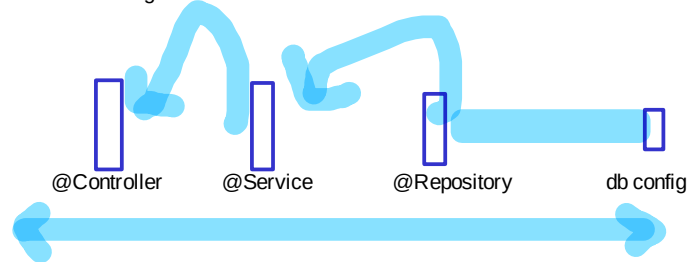

post / put

Whatever data user is inputing into the form it should be populated into a java object
that java object is called form bean

1. attache a form bean
with form

from bean

3 imp feature:
form validation
data buffering
data validation

2. while post operation
spring will give that bean back to your

* Servlet basics
* Spring mvc arch
* how to integrate 3 tier arch

@Controller   @Service   @Repository   db config

jackson-databind
is used to convert our dto -> json object
